AMERICAN
LADDER
INSTITUTE

About ALI

The American Ladder Institute (ALI) is a national trade association whose mission is education of the public as to the proper selection, care and safe use of ladders. ALI is the American National Standards Institute (ANSI) approved developer of industry standards. The ALI also represents the business interests of its membership, which is comprised of ladder manufacturers and component suppliers.

The ALI was formed in 1948, and has evolved along with the manufacturing industry. The ALI is a member of the National Safety Council, and is in the process of developing a multimedia online ladder safety training program.

Please Visit our Websites:

Member Benefits

Networking Opportunities....Increase your networking and business opportunities through ALI's two annual meetings, website and quarterly newsletter. The annual conventions combine education, business, networking and social activities in a relaxed atmosphere. Meet and correspond with manufacturer and associate members from across the country.

LadderSafety.org...ALI's newest training resource for safe ladder use. The information on this site is organized by ladder type with additional resources listed for more technical support. The site provides valuable safety information in a consumer friendly manner for all ladder users, professional & in home.

Multimedia Training Program...Currently being developed to provide online training to professionals, this program involves specific educational content based on the selection, care and safe use of ladders. Modules are determined by ladder type, with a testing feature and certificate of completion.

Working Committees....Willing to lend a hand? ALI's objectives are realized through a strong committee structure and an active Board of Directors. We welcome new members to participate in any of the following committees: Associates, Material Supply, Membership, Product Liability, Education, Standards, and Conference.

A14 Committee.... ALI is the American National Standards Institute (ANSI) approved developer of industry standards; as such, ALI manages the standards development

process. As the Secretariat of the A14 committee, ALI has developed a solid and professional working relationship across a broad spectrum of interests and disciplines, all contributing to a strong and responsive voluntary standards process.

Important Industry Partnerships.....ALI actively participates with the National Safety Council (NSC), American National Standards Institute (ANSI), Consumer Product Safety Commission (CPSC), and the Occupational Safety and Health Administration (OSHA) to represent the interests of our industry. ALI is also the voice of our industry before governmental commissions and agencies, and has recently entered into a partnership with the National Institute for Occupational and Safety Health Administration (NIOSH) involving safety research and testing.
